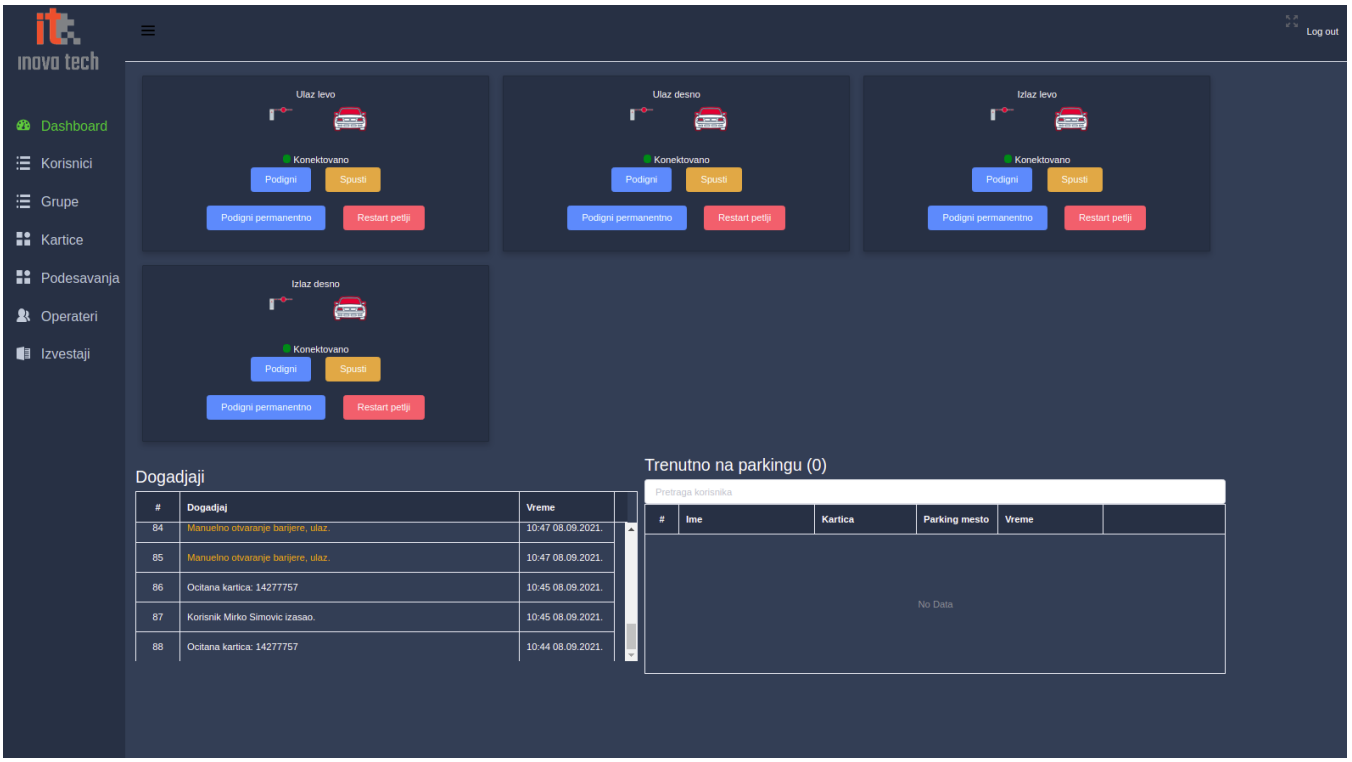
Kontrola prolaska vozila

Naš softver je tako dizajniran da na najjednostavniji način možete imati uvid u pregled svih korisnika koji imaju pristup parkingu, kao i svih njegovih kartica (korisnik može opciono imati i više od jedne kartice). Možete videti i kompletnu istoriju svih događaja koji uključuju tačno vreme za sve očitane kartice pri ulasku/izlasku vozila na/sa parking(a) kao i manuelna(ručna) otvaranja barijera koje su postavljene na ulaz/izlaz parking prostora.

Možete preuzeti izveštaje u Excel formatu o ulazima i izlazima korisnika za zadati period za sve korisnike i za svakog korisnika pojedinačno.



Sistem omogućava da vidite status svih rampi (konektovanih ili ne) kao i mogućnost njihovog podizanja/spuštanja pritiskom na dugme.

Softver nudi mogućnost pravljenja grupe vozila.

Primer: grupa može biti firma koja ima 10 parking mesta, ali njihovih 50 radnika imaju kartice. Sistem tad pusti na parking prvih 10 vozila, a ostali mogu da uđu samo ako pre toga neko izađe i oslobodi mesto.
